Climate

Mild and dry winter weather marked the beginning of the 2020 growing season in Chianti Classico, only at the end of March did the area experience a brief cold spell. These climatic conditions prompted early bud break. Spring brought average rainfall and rather cool temperatures while the following summer months were hot, uninterrupted by extreme heat events and favored with brief periods of rain showers that provided grape clusters with perfect conditions for optimal growth and ripening. The month of September, when harvesting operations got underway, was defined by scattered light precipitation, especially at the end of the month, that allowed the fruit to complete phenolic maturity. The harvest window was an intense three weeks, from September 20th up until October 9th, picking began with Sangiovese and Cabernet Franc and was completed with Cabernet Sauvignon.

Vinification

This growing season's climate trends challenged us to be focused and diligent both in the vineyards during harvesting activities and when grapes were brought to the cellar where sorting operations and initial winemaking processes were essential to achieve optimal results. During fermentation in truncated conical tanks, each individual must was macerated on the skins giving particular emphasis to preserving aromas, extracting color, and encouraging desirable tannins that were supple and elegant. Racking was performed after rigorous daily sampling and tasting. Once separated from the skins, the wine was transferred into small oak barrels where it underwent malolactic fermentation to accentuate aromatic finesse and complexity. Aging took place in French and Hungarian oak barrels, partly new and partly second passage, for a total of 15 months: after an initial period of aging the lots separately, they were blended then completed barrel aging. Tignanello, made primarily with Sangiovese and a small percentage of Cabernet Sauvignon and Cabernet Franc, underwent an additional 12-month period of aging in the bottle before being released.

Historical Data

Tignanello is produced exclusively from the vineyard of the same name, a parcel of some 140 acres (57 hectares) with limestone-rich soils and a southwestern exposure at 1150-1325 feet (350-400 meters) above sea level at the Tignanello estate. It was the first Sangiovese wine to be aged in small oak barrels, the first modern red wine to use such non-traditional varieties as Cabernet in the blend, and among the first red wines from the Chianti Classico area to be produced without white grapes. The wine, originally called "Chianti Classico Riserva Vigneto Tignanello" (a Chianti Classico Riserva from the Tignanello vineyard), was produced for the first time from a single vineyard parcel in 1970, when the blend contained 20% of Canaiolo and 5% of Trebbiano and Malvasia, both white grapes, and the wine aged in small oak barrels. In 1971 it became a Tuscan red table wine rather than a Chianti Classico, and was called Tignanello. In the 1975 vintage the percentage of white grapes was definitively eliminated from the blend. Ever since 1982, the blend has been the one currently used. Tignanello is bottled only in favorable vintages, and was not produced in 1972, 1973, 1974, 1976, 1984, 1992, and 2002.

Tasting Notes

Intensely ruby red in color, Tignanello 2020 has exceptional aromatic complexity: notes of ripe red fruit especially cherries, strawberries and blackberries are accompanied by delicate floral hints of violets, mallow blossoms and roses. Its bouquet is completed by notes of roasted coffee and cocoa powder. The vibrant entry gives way to a caressing layered mouthfeel. The wine closes with spicy notes of pepper and licorice that merge with pleasant sensations of aromatic herbs for a fresh, lengthy finish.
